

Radon Measurement Professionals

Two national radon programs, listed below, certify radon measurement professionals. Please refer to their websites for the most up to date information, and for certified professionals in nearby states that service South Carolina. *Please note:* the individual is certified, not the company. Each program has a sub-level certification for measurement. Below is a brief description:

- National Radon Proficiency Program (NRPP): www.aarst-nrpp.com/wp/ or 1-800-269-4174
 - Certified Residential Measurement (RT): Places and retrieves measurement devices for analysis by a certified laboratory.
 - Standard & Analytical (SA): Places and retrieves measurement devices for analysis by a certified laboratory, and/or analyzes specific measurement devices on behalf of a client (but not for other measurement professionals).
 - Advanced Certificate in Multifamily Measurement (MFM)
- National Radon Safety Board (NRSB): www.nrsb.org or 1-866-329-3474
 - Radon Measurement Technician (RMT): Radon Measurement Technicians are people who have been trained and certified in the fundamentals of radon testing. RMTs are qualified to place and retrieve measurement devices for the purpose of collecting radon data.
 - Radon Measurement Specialist (RMS): requires demonstration of knowledge which goes significantly beyond that required of a technician. RMS's are qualified to analyze -- rather than simply report -- radon measurements in a manner that is consistent with current knowledge.

A list of South Carolina-based certified measurement professionals follows.

South Carolina-based Nationally Certified Radon Measurement Professionals

The following individuals offer radon measurement services. SC DHEC does not recommend or endorse any company, its services or products. DHEC takes no responsibility for the accuracy or completeness of this list, but it has been updated as accurately as possible as of May 21, 2020. The list is alphabetical by last name.
